### Main Motion C-10.01

**Amendment to the Radiologist Assistant Practice Standards Introduction**

The Practice Standards Council moves to amend the Radiologist Assistant Practice Standards Introduction, pages 2-4, by:

- Substitution.

**Introduction to Radiologist Assistant Practice Standards**

**Definition**

A radiologist assistant is an advanced-practice radiographer who practices under the supervision of a radiologist and enhances patient care in radiology services. As a member of the radiologist-directed team, the radiologist assistant exercises independent professional judgment in the performance of patient assessment, patient management and procedures in medical imaging and interventional radiology.

**Education and Certification**

The radiologist assistant is a health care professional prepared to practice in the field of medical imaging as a mid-level provider, with a minimum of five years academic preparation, clinical preceptorship and clinical experience. Radiologist assistants are radiographers who
have completed didactic and clinical education in a radiologist assistant program recognized by a mechanism acceptable to the American Registry of Radiologic Technologists (ARRT). The individual must have earned a baccalaureate degree, post-baccalaureate certificate or graduate degree from an academic program encompassing a nationally recognized radiologist assistant curriculum that includes a radiologist-directed clinical preceptorship. Advisory committees of radiologist assistant programs should include radiologist representation.

Academic curriculum and clinical preceptorship prepares the graduate to:

A. Assess, monitor, and manage patient physiologic and psychologic status.
B. Perform invasive and noninvasive imaging procedures as delegated by the radiologist who is licensed to practice and has privileges for the procedure being performed by the radiologist assistant.
C. Obtain images necessary for diagnosis and provide initial observations to the delegating radiologist.
D. Emphasize patient safety and verify procedure appropriateness by analyzing and incorporating evidenced-based practices for optimal patient care.
E. Advocate for patient and personnel radiation safety by employing the ALARA principle to minimize patient and occupational radiation dose.
F. Participate in quality improvement activities within the radiology practice.
G. Assist with data collection and review for clinical trials or other research.

Upon completion of a radiologist assistant program recognized by the ARRT, individuals may apply to take the ARRT national certification examination. Those who successfully complete the certification examination may practice as a registered radiologist assistant (R.R.A.) and identify themselves as such. In accordance with ARRT protocol, the R.R.A. may then add these credentials following his or her name, e.g., Jack Smith, R.R.A., R.T.(R).

To maintain certification, the R.R.A. must complete 50 continuing education credits per biennium, as defined by the ARRT, to sustain expertise and awareness of changes and advances in practice.

Overview

An interdisciplinary team of radiologists, radiologist assistants, radiographers and other support staff plays a critical role in the delivery of health services as new modalities emerge and the need for imaging procedures increases. A comprehensive procedure list for the radiologist assistant is impractical because clinical activities vary by practice needs and expertise of the radiologist assistant. As radiologist assistants gain more experience, knowledge and clinical competence, the clinical activities for the radiologist assistant may evolve. The clinical activities are delegated by the supervising radiologist in accordance with state statute or regulations and lawful institutional policies.

State statute, regulation or lawful community custom may dictate practice parameters. Wherever there is a conflict between these standards and state or local statutes or regulations, the state or local statutes or regulations supersede these standards. A radiologist assistant should, within the boundaries of all applicable legal requirements and restrictions, exercise individual thought, judgment and discretion in the performance of the procedure. In addition,
because a radiologist assistant holds radiographer credentials, specific criteria for radiographers are incorporated into these standards by reference. Both the Radiologist Assistant and Radiography sections of the Practice Standards for Medical Imaging and Radiation Therapy Professionals should be consulted when seeking practice information for radiologist assistant practice.

**Practice Standards**

The practice standards define the practice and establish general criteria to determine compliance. Practice standards are authoritative statements established by the profession for judging the quality of practice, service, and education.

**Format**

The practice standards are divided into five sections: scope of practice, clinical performance, quality performance, professional performance and advisory opinion.

*Scope of Practice.* The scope of practice delineates the parameters of radiologist assistant practice.

*Clinical Performance Standards.* The clinical performance standards define the activities of the radiologist assistant in the care of patients and delivery of diagnostic or therapeutic procedures. The section incorporates patient assessment and management with procedural analysis, performance and evaluation.

*Quality Performance Standards.* The quality performance standards define the activities of the radiologist assistant in the technical areas of performance including equipment and material assessment, safety standards and total quality management.

*Professional Performance Standards.* The professional performance standards define the activities of the radiologist assistant in the areas of education, interpersonal relationships, self assessment and ethical behavior.

*Advisory Opinion Statements.* The advisory opinions are interpretations of the standards intended for clarification and guidance for specific practice issues.

A profession’s practice standards serve as a guide for appropriate practice. Practice Standards provide role definition for radiologist assistants that can be used by individual facilities to develop job descriptions and practice parameters. Those outside the imaging, therapeutic and radiation science community can use the standards as an overview of the role and responsibilities of the radiologist assistant as defined by the profession.

Each section is subdivided into individual standards. The standards are numbered and followed by a term or set of terms that identify the standards, such as “assessment” or “analysis/determination.” The next statement is the expected performance of the radiologist assistant when performing the procedure or treatment. A rationale statement follows and explains why a radiologist assistant should adhere to the particular standard of performance.
Criteria. Criteria are used in evaluating a radiologist assistant’s performance. Each set is divided into two parts: the general criteria and the specific criteria. Both general and specific criteria should be used when evaluating performance.

General Criteria. General criteria are written in a style that applies to imaging and radiation science professionals. These criteria are the same in all sections of the standards and should be used for the appropriate area of practice.

Specific Criteria. Specific criteria meet the needs of the radiologist assistants in the various areas of professional practice. While many areas of practice within imaging and radiation sciences are similar, others are not. The specific criteria are drafted with these differences in mind.

Main Motion C-10.02
Amendment to the Radiologist Assistant Practice Standards Scope of Practice
The Practice Standards Council moves to amend the Radiologist Assistant Practice Standards Scope of Practice, pages 5-7, by:

• Substitution.

Performance of clinical activities by the radiologist assistant is defined by educational preparation, documented clinical competence with radiologist supervision and radiologist delegation in accordance with state laws, regulations, and lawful institutional policy.

Preprocedure responsibilities include, but are not limited to, completing patient history and physical, determining procedure appropriateness and participating in informed patient consent. The radiologist assistant reviews variances identified through preprocedural evaluation that may influence the expected outcome with the delegating radiologist prior to the procedure.

The radiologist assistant performs or assists the radiologist with noninvasive and invasive radiology procedures using image guidance as appropriate. The radiologist assistant participates in the preparation, administration and documentation of contrast media and pharmaceuticals. The radiologist assistant assesses monitors and manages patient status including patients under moderate sedation.

Postprocedural responsibilities include, but are not limited to, evaluating images for completeness and diagnostic quality, reporting initial observations to the delegating radiologist, providing follow-up patient evaluation and communicating the radiologist’s report to the appropriate health care providers. The radiologist assistant does not provide an image interpretation as defined by the American College of Radiology (ACR).

Radiologist assistants act as liaisons between patients, radiographers, radiologists and other members of the health care team. Radiologist assistants remain sensitive to the physical, cultural and emotional needs of patients through good communication, comprehensive patient assessment, continuous patient monitoring and advanced patient care skills. Radiologist
assistants use independent, professional, ethical judgment and critical thinking to safely perform imaging procedures. Radiologist assistants commit to continued professional development to enhance patient care, public education, knowledge and technical competence while embracing a life of learning.

Amendment to the Radiologist Assistant Practice Standards, Clinical Performance Standards, Standard One – Assessment, Specific Criteria

The Practice Standards Council moves to amend the Radiologist Assistant Practice Standards, Clinical Performance Standards, Standard One - Assessment, Specific Criteria, page 8, by:

- Substitution.

**Specific Criteria**
The radiologist assistant:

1. Performs and documents a radiology-focused physical examination, and analysis of data (e.g., signs and symptoms, laboratory values, vital signs, and significant abnormalities), and reports findings to the delegating radiologist.

2. Observes and assesses a patient who has received moderate sedation.

3. Assesses the patient’s level of anxiety and pain, and informs delegating radiologist.

4. Interviews patient to obtain, verify and update medical history.

Amendment to the Radiologist Assistant Practice Standards, Clinical Performance Standards, Standard Three – Patient Education, Specific Criteria

The Practice Standards Council moves to amend the Radiologist Assistant Practice Standards, Clinical Performance Standards, Standard Three - Patient Education, Specific Criteria, page 10, by:

- Substitution.

**Specific Criteria**
The radiologist assistant:

1. Explains procedure to the patient or significant others, including a description of risks, benefits, alternatives and follow-up.

2. Provides prescribed postcare instructions as ordered by the delegating radiologist.
3. Obtains informed consent.

4. Provides information regarding risks and benefits of radiation.

5. Refers questions about diagnosis, treatment, or prognosis to the delegating radiologist.

**Motion:** Gary Duehring (author and Management Chapter delegate): “I move to withdraw.”

**Action:** Adopted with no objection.

**Main Motion C-10.39**

**Motion titled “Qualifications for Educators Teaching Radiologic Sciences”**

Paulette Peterson (New York affiliate delegate) moves:
I move the American Society of Radiologic Technologists adopt the position statement “Qualifications for Educators Teaching Radiologic Sciences” that reads:

**Qualifications for Educators Teaching Radiologic Sciences**

It is the position of the American Society of Radiologic Technologist that all full time educators in the Radiologic Sciences have, at a minimum, a Baccalaureate degree in education and that they be required to accumulate twelve education related credits per biennium effective 2012. Current educators will demonstrate 12 continuing education credits in education related topics in their biennium beginning with their next biennium window.

**Action:** Ruled out of order by the speaker. The establishment of CE requirements is the purview of the certifying agencies and the ASRT does not have authority to mandate requirements set by other organizations.

**Action:** Paulette Peterson (New York affiliate delegate) appealed the decision of the speaker to rule Motion C-10.39 out of order.

**Action:** The speaker’s decision to rule Motion C-10.39 out of order was sustained by the House 86 YES, 59 NO
Main Motion C-10.40
Motion titled “Composition of the American Registry of Radiologic Technologists Board of Trustees”

Paulette Peterson (New York affiliate delegate) moves:
I move the American Society of Radiologic Technologists adopt the position statement “Composition of the American Registry of Radiologic Technologists Board of Trustees” that reads:

Composition of the American Registry of Radiologic Technologists Board of Trustees
The American Registry of Radiologic Technologists shall be comprised of one American College of Radiology appointed radiologist, one public member, one Radiation Therapist, one Nuclear Medicine technologist and five Radiographers; none of these members shall have been an officer of the organization that appointed them.

Action: Ruled out of order by the speaker. The ASRT does not have authority to mandate to another organization who should be seated on their board or qualifications for their appointees.

Following Main Motion C-10.40 the following motion was made:

Motion: The Commission moves that the Commission be authorized to correct punctuation and cross-references and to make such other editorial and conforming changes to the position statements and Practice Standards as may be necessary to reflect the intent of the Society in connection with adopted position statements and amendments.

Action: Adopted 143 YES, 2 NO
